DETAILED ACTION

1. This application has been examined. The claims 1-3 are allowed.

Reasons For Allowance

2. The following is an examiner's statement of reasons for allowance: The present invention is directed to display apparatus of semi-transmissive type for performing both reflective display and transmissive display, a display mode of the reflective display and a display mode of the transmissive display being different in relationship between an applied voltage and transmissivity or relationship between the applied voltage and reflectivity, the display apparatus comprising: gradation reference potential generating means including two series of two variable resistors and a ladder resistor located between the two variable resistors, the ladder resistor outputting gradation reference potential of a required number of gradation levels, each of the series dividing a power source voltage. The closest prior art of Kudo et al. (US 7,023,458) showed a similar invention, however, he fails to teach that the resistance value setting data being for setting resistance values of the variable resistors so that when the display is in the transmissive display mode the variable resistors are set using a first set of values, but when the display is in the reflective display mode the variable resistors are set using a different second set of values as claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
